LEGAL NOTICE

Geauga County

Notice is hereby given that sealed bids will be received by the Geauga County Board of Commissioners, c/o Christine Blair, Clerk, 470 Center Street, Building 4, Chardon, Ohio 44024 until 1:45 P.M. official local time on Wednesday, March 20, 2019 for **The Asphalt Resurfacing of Sections A-C of Rapids Road, CH 1.** Bids received will be publicly opened and read aloud the same day at 2:00 P.M. The estimated construction cost for this project is **\$500,000.00.**

Copies of the surveys, plans, profiles, cross sections and specifications are on file with the Board of County Commissioners and may be obtained digitally online at <http://www.co.geauga.oh.us/Departments/Engineer/OnlinePlans.aspx> or a hardcopy is available at the Geauga County Engineer's Office, 12665 Merritt Road, Chardon, Ohio 44024.

A copy of this legal notice is posted on the county's internet site on the World Wide Web. Go to <http://www.co.geauga.oh.us/Bids.aspx> and click on the project name to view this legal.

A bid guaranty in the amount of one hundred (100%) percent of the bid amount or a certified check, cashier's check or letter of credit pursuant to Chapter 1305 of the Ohio Revised Code in the amount of ten (10%) percent of the total bid amount shall accompany each bid. The bid shall be let upon a unit price basis.

All contractors and subcontractors involved with the project will, to the extent practicable, use Ohio products, materials, services, and labor in the implementation of their project. Bidders must comply with the prevailing wage rates on Public Improvements as determined by the Ohio Department of Industrial Relations.

Bids may be held by the Geauga County Board of Commissioners for a period not to exceed sixty (60) days from the date of opening, for the purpose of reviewing the bids and investigating the qualifications of bidders, prior to awarding the contract.

The Geauga County Board of Commissioners reserves the right to reject any and all bids, to waive any informalities or irregularities in the bids received, and to accept any bid or bids which are deemed most favorable to the Board at the time and under conditions stipulated, all in accord with the applicable provisions of laws of the State of Ohio governing the conduct of the Geauga County Board of Commissioners.

BY THE ORDER OF THE GEAUGA COUNTY BOARD OF COMMISSIONERS

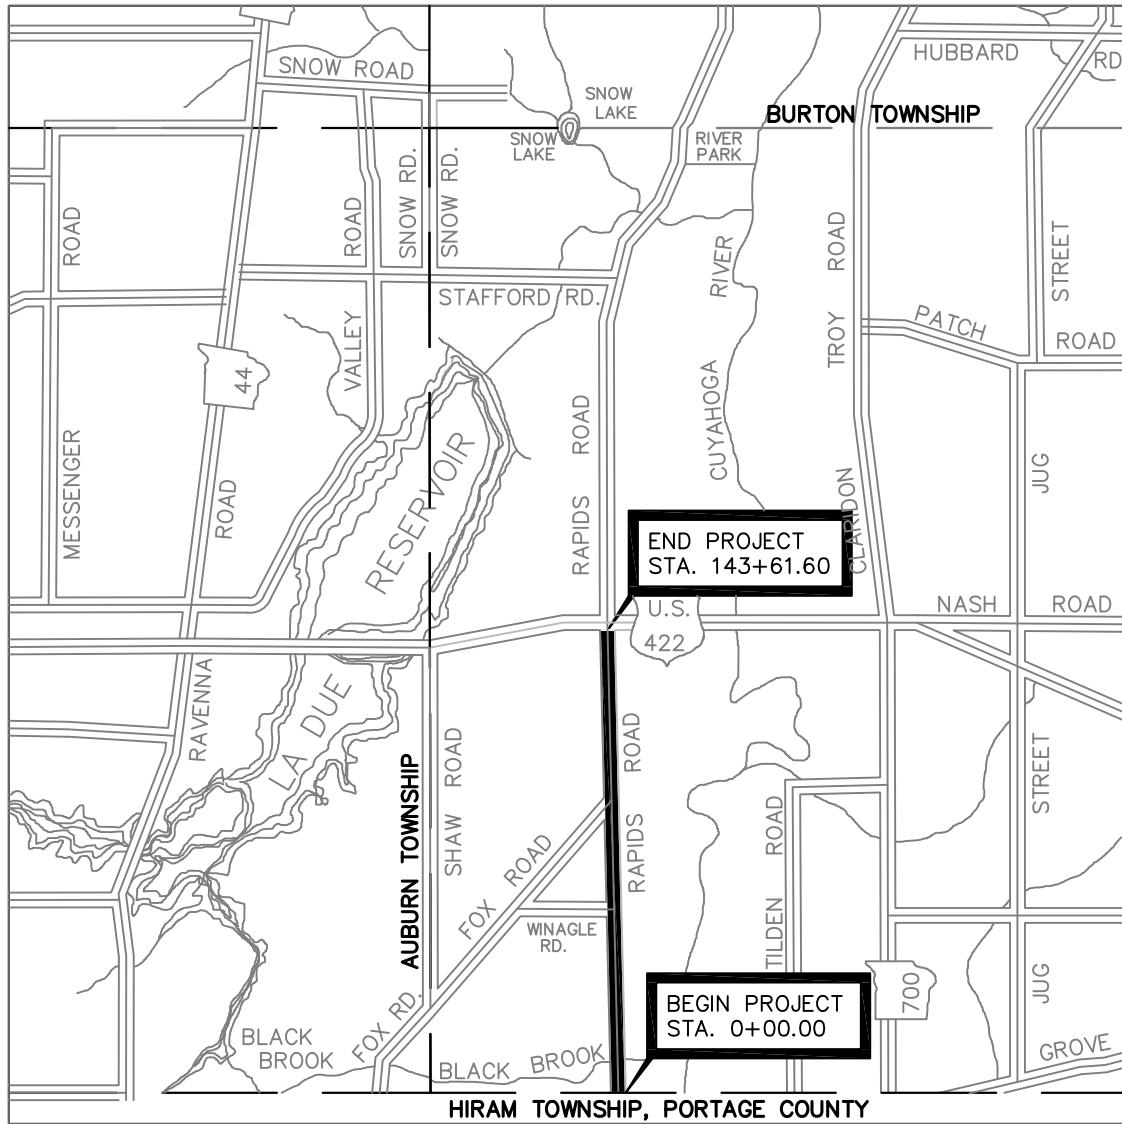

Christine Blair, Clerk

DESCRIPTION OF WORK

Section 1 General

The Construction and Material Specifications dated 2016 published by the Ohio Department of Transportation (ODOT) and the Modifications to the Ohio Department of Transportation's 2016 Construction and Material Specifications for Geauga County dated 2019 shall govern this project except where otherwise noted in this Specification Booklet. The Standard Contract Provisions for Contracts Prepared by the Geauga County Engineer's Office dated 2019 shall govern the contractual agreement for this project. These Documents are available on the Geauga County Engineer's Web Site, go to <https://www.co.geauga.oh.us/Departments/Engineers-Office/Online-Plans> to view these documents or they may be picked up at the Engineer's Office. The requirements of Section 4115 of the Ohio Revised Code with regards to prevailing wages shall be followed for this project.

The project shall include the Asphalt Resurfacing of Sections A-C of Rapids Road, CH 1. The project locations are generally shown on the Location Map. The work shall include improvement of approximately 2.72 miles of roadway. All work for this project shall be completed within the existing right of way. No work shall be done within existing streams or wetlands.

RAPIDS ROAD, CH 1

TROY TOWNSHIP, GEAUGA COUNTY

* STATION 0+00.00 IS LOCATED AT THE MONUMENT BOX AT THE PORTAGE COUNTY LINE

Section 2 Inspection and Notification

A pre-construction conference will be scheduled by the Engineer with the Contractor prior to the start of construction. The Contractor shall submit a detailed Schedule of Operations for approval 24 hours prior to the pre-construction meeting. The Contractor shall notify the Engineer at least seven (7) days in advance of the beginning of construction, so the Engineer may schedule the inspection.

The Contractor shall notify the local fire department, police and other appropriate agencies that may require the use of the road during emergency situations. If any area becomes inaccessible at any time, the Contractor shall immediately notify the agencies of these locations. The Contractor shall schedule his work and coordinate with local schools as listed below to accommodate the pick-up and delivery of school students if applicable.

LOCAL AGENCY CONTACT NUMBERS:

Geauga County Sheriff	(440) 279.2009
State Highway Patrol	(440) 286.6612
Geauga Transit	(440) 279.2150
Geauga Metzenbaum	(440) 729.9406
United States Postal Service (Burton)	(440) 834.8656
Berkshire Local School District	(440) 834.3380
Troy Road Department	(440) 834.1293
Troy Fire Department	(440) 834.1810

UTILITY OWNERS AND CONTACT PERSONNEL:

The Contractor is required to contact OHIO811, 8-1-1 or (800) 362-2764 or OHIO811.org a minimum of two (2) working days prior to commencing any work.

The utilities listed below may have facilities within the project limits:

Orwell Natural Gas	Jeff Heidnik	(440) 413.9809
Dominion East Ohio Gas	Bryan Dayton	(330) 664.2409
The Illuminating Co.	Tim Denzler	(440) 953.7650
Windstream	Jon Hobby	(440) 285.5474
Suddenlink	Jerry Walsh	(330) 207.0894
AT&T	James Janis	(216) 476.6142
Enervest Gas Pipelines	Kenneth Kreager	(330) 877.6747
Summit Petroleum	Linda Mahne	(330) 487.5494
Dry Hole	Eric Lindberg	(330) 720.8185

Section 3 Maintaining Traffic

Rapids Road – CH 1 [2.72 Mile] - Traffic shall be maintained for the duration of the project.

The approximate ADT for these sections of Rapids Road is 600 vehicles per day.

ODOT Item 614 - Maintaining Traffic

The Contractor shall furnish at least two (2) employees to serve as traffic control flaggers and the work zone shall follow the specifications set forth in ODOT SCD MT-97.11. In order to properly maintain traffic, the Contractor shall use additional flaggers when working at the intersections of adjacent roads. A Law Enforcement Officer shall be used in the signalized intersection when work is in progress within 500' of the intersection.

All traffic control devices shall be installed, erected, maintained and removed by the Contractor, at the direction of the Engineer. The sign quantities in brackets are the minimum number of signs to be installed. Additional signs may be required and installed as directed by the Engineer. "ROAD WORK AHEAD" (W20-1) signs with D-3[Rapids Road] shall be placed at the project beginning and project ending locations as well as intersecting side roads. The Contractor shall install orange "NO EDGE LINES" signs [ten (10)] at the beginning and end locations of the project and every one-half mile in each direction along the project as directed by the Engineer. The Contractor shall also install white "DO NOT PASS" (R4-1) signs [Ten (10)] at these locations until the application of the final pavement markings. Before the pavement planing operation, the Contractor shall furnish and maintain orange "GROOVED PAVEMENT AHEAD" signs [Five (5)] in advance of each beginning location and ending location as well as intersecting side roads for the pavement planing areas until the placement of the intermediate course.

All signs and barricades shall meet the reflective requirements of ODOT Item 630.04. Local Officials, as listed above, shall be contacted forty-eight (48) hours prior to the start of the work.

All work and traffic control devices shall be in accordance with ODOT Item 614 and other applicable portions of the specifications, as well as the Ohio Manual of Uniform Traffic Control Devices. Payment for all labor, equipment and materials shall be included in the Lump Sum contract price for ODOT Item 614, Maintaining Traffic, unless separately itemized in the plan.

ODOT Item 614 - Work Zone Center Line, Class II, 740.06, Type 1

The Contractor shall furnish and install temporary retro-reflective centerline pavement markings on the roadway following the pavement planing, application of the intermediate asphalt course, and the application of the asphalt surface course. The temporary retro-reflective centerline pavement marking shall be Type 1 paint following the pavement planing process.

Section 4 Construction

◆ ♦ ♦ **Rapids Road - CH 1 [2.72 Mile]** ◆ ♦ ♦

Sequence of Construction:

1. Pre-Construction Meeting
2. Traffic Maintenance Install / Mobilization
3. Construction Layout
4. Pavement Planing / Wearing Course Removed
5. Pavement Repairs
6. Type 2 Asphalt Intermediate Course
7. Type 1 Asphalt Surface Course (Driveways)
8. Polymer Asphalt Surface Course
9. Compacted Aggregate (RACP)
10. Permanent Pavement Marking
11. Detector Loop
12. Incidentals (Misc.)
13. Project Completion / De-Mobilization

Unless approved by the Engineer, the Contractor shall plan and prosecute the work in accordance with the above Sequence of Construction.

ODOT Item 253 - Pavement Repair, By Depth, As Per Plan

This item shall include all labor, equipment and material necessary to remove and replace the existing asphalt pavement and base, as marked by the Engineer. The asphalt pavement and base in the repair areas shall be removed by the grinding or saw cut methods without displacing or damaging the remaining pavement. The excavated trench shall be compacted utilizing approved compaction equipment. All faces adjoining existing pavement shall be cleaned and thoroughly coated with an approved liquid asphalt material. The Contractor shall use ODOT Item 301 Asphalt Concrete Base, PG64-22, to replace the excavated material. The cost of the material is to be included in the Bidder's unit price bid for this item.

The anticipated depth of pavement to be removed is shown on the table below and shall be completed after the pavement planing process is completed. Any additional excavations shall be made to a depth as directed by the Engineer. Payment for Pavement Repair shall be by the cubic yard of asphalt base material placed. A table of areas to be repaired has been provided and will be clearly marked by the Engineer in the field.

SUB-TOTAL (CY): 178.76

USE (CY): 150.0

ODOT Item 254 - Pavement Planing, 2.0", Asphalt Concrete, As Per Plan

Pavement Planing will be performed to the lines and grades shown on the typical section. The existing asphalt pavement shall be removed at an anticipated average depth of two inches (2.0") at full width of pavement in specified areas unless otherwise noted. The Contractor shall remove the existing asphalt to an approximate slope of two percent (2%) across the lane in areas of normal crown.

The Contractor shall grind up to a minimum of four feet (4.0') into each side road and a minimum of two feet (2.0') into each driveway or as marked by the Engineer. For this process the Contractor shall use Engineer approved milling equipment. For driveway aprons, the mill depth shall be two inches (2.0") at the edge of the milled roadway surface and one and one-quarter (1.25") at the marked stopping point. The Contractor shall maintain and supply proper access to all drives and intersections throughout the milling process.

This work shall include the required butt joints for the side roads. Butt joints, per ODOT SCD BP-3.1, will be required at the following locations, as marked by the Engineer:

- Greystone Drive (45.0 SY)
- Winagle Road (45.0 SY)
- Fox Road (55.0 SY)

Care shall be taken to not damage any residential driveways, curb sections and/or castings during the planing process. Temporary ramps at bridge approaches and driveways shall be placed as directed, in order to maintain access to the roadway. The Contractor shall cut slots at all elevation low points for drainage. The Contractor shall remove all grindings from the job site and thoroughly sweep the ground roadway section before opening it up to traffic.

All asphalt grindings shall be transported to the Geauga County Engineer's Highway Maintenance Yard at 12665 Merritt Road, Chardon, Ohio. All costs associated with loading, transportation and disposal shall be included in the Bidder's unit price bid for this item.

ODOT Item 407 – Non-Tracking Tack Coat

Tack coat shall be applied to the existing asphalt prior to the placement of the intermediate course. The Engineer may adjust the application rate of 0.09 gallons per square yard. An additional quantity of tack coat to be applied on the intermediate course of asphalt prior to the placement of the surface course is included in the total quantity for this item. This quantity has been calculated at the application rate of 0.05 gallons per square yard and shall only be used at the direction of the Engineer.

ODOT Item 424 - Fine Graded Polymer, Asphalt Concrete, Surface Course, Type B, PG76-22M

The Contractor shall place a surface course as shown on the typical sections. The Contractor shall cover all existing asphalt pavement. The Contractor shall use four (4) rollers to compact the surface course including one (1) vibratory roller, two (2) tandem rollers, and one (1) small tandem roller. The vibratory roller shall be used to breakdown and compact the course with vibration used in only one direction of travel. The tandem rollers shall be used as the finish roller. The small tandem roller shall be used to compact areas where the large tandem roller cannot reach, including mailbox approaches and driveway transitions. The surface course shall not be placed the same day as the intermediate course.

ODOT Item 441 - Asphalt Concrete, Intermediate Course, Type 1, (448) PG64-22,

The Contractor shall place an intermediate course as shown on the typical sections. The Contractor shall use three (3) rollers to compact the intermediate course. A vibratory roller shall serve as the breakdown roller and compact the course with vibration used in only one direction of travel and two (2) tandem rollers shall be the second and finish roller.

ODOT Item 441 - Asphalt Concrete, Surface Course, Type 1, PG64-22 (Driveways)

The Contractor shall place driveway and intersection aprons at a depth of one and one-half inches (1.5"), at the locations marked by the Engineer. The paving of the driveways shall be a separate operation from the mainline paving. The lengths of aprons are subject to change at the direction of the Engineer. This operation shall be completed after the placement of the intermediate course and before the placement of the surface course. The aprons shall be feathered to meet existing drive grades. All asphalt drives and intersecting roads shall be swept thoroughly and then tacked with ODOT Item 407 prior to paving the aprons. The Contractor shall use Engineer approved compaction equipment.

ODOT Item 617 - Compacted Aggregate (RACP)

The Contractor shall place the stabilized shoulder back up material in one (1) lift at an average width of fifteen inches (1'-3") along the entire length of the roadway. The Contractor shall use a compaction method approved by the Engineer. The material placement shall not take place within a twenty-four hour (24hr) period of time, after the completed placement of the surface course.

ODOT Item 632 - Detector Loop

The Contractor shall replace detector loops per ODOT TC-82.10 at the following location, as required by the Engineer, if destruction is unavoidable during the normal roadway construction activities:

- Main Market (US 422)

ODOT Item 642 - Edge Line, 4", Type 1

ODOT Item 642 - Center Line, Type 1

ODOT Item 644 - Stop Line

The Contractor shall apply permanent paint pavement markings to the new asphalt surface. The Contractor shall apply centerline and edge line pavement markings according to the centerline logs approved by the Engineer. The lanes shall be striped at a width of Ten feet (10'-0"). Edge lines shall include the intersection radii and shall connect to the intersecting roadways.

All work and traffic control devices shall be in accordance with ODOT Item 614, SCD MT 99.20 and other applicable portions of the specifications, as well as the Ohio Manual of Uniform Traffic Control Devices.

Stop bars, per ODOT SCD TC-71.10, shall be placed as listed at the locations below. The Engineer will mark the exact location.

- Greystone Drive (10 Feet)
- Winagle Road (10 Feet)
- Fox Road (10 Feet)
- Main Market (U.S. 422) (10 Feet)

		TRANSPORTATION DEPARTMENT ADMINISTRATOR STATE OF OHIO DEPARTMENT OF STDS.	OFFICE OF ROADWAY ENGINEERING	D. Miller D. Did J. Humphrey 7-18-2014

THIS DRAWING REPLACES BP-3.1 DATED 04-20-2012.

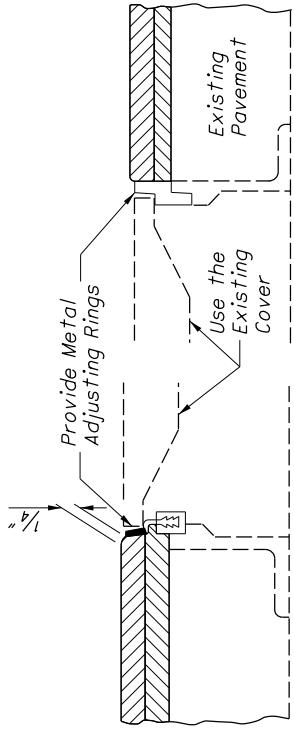

USING CONCRETE OR MORTAR

Metal adjusting rings shall:

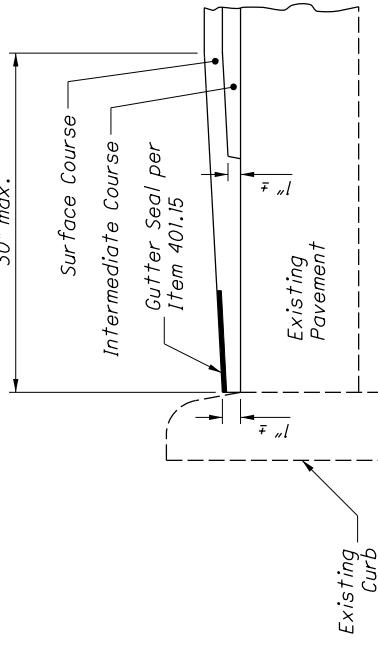

- (a) Attach securely to the existing frame by welding or mechanical devices;
- (b) Consist either of cast metal having an integral rim and seat, or be fabricated metal with a sturdy connection between the seat and rim; and
- (c) Provide an even seat for the manhole cover.

In addition, the adjusting ring type shall be a design acceptable to the local governmental agency responsible for street and sewer maintenance. Any installation unacceptable to the Engineer shall be replaced by the Contractor at his expense.

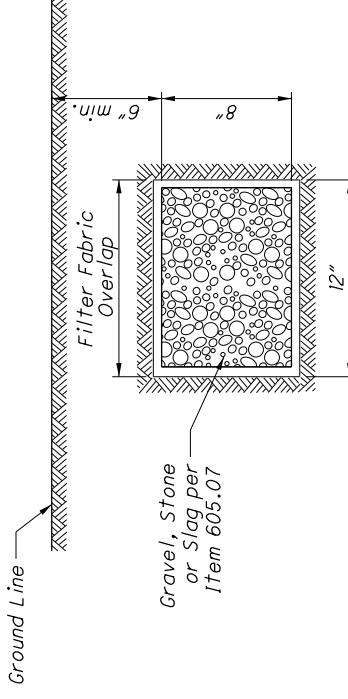

USING METAL ADJUSTING RINGS

MANHOLES ADJUSTED TO GRADE

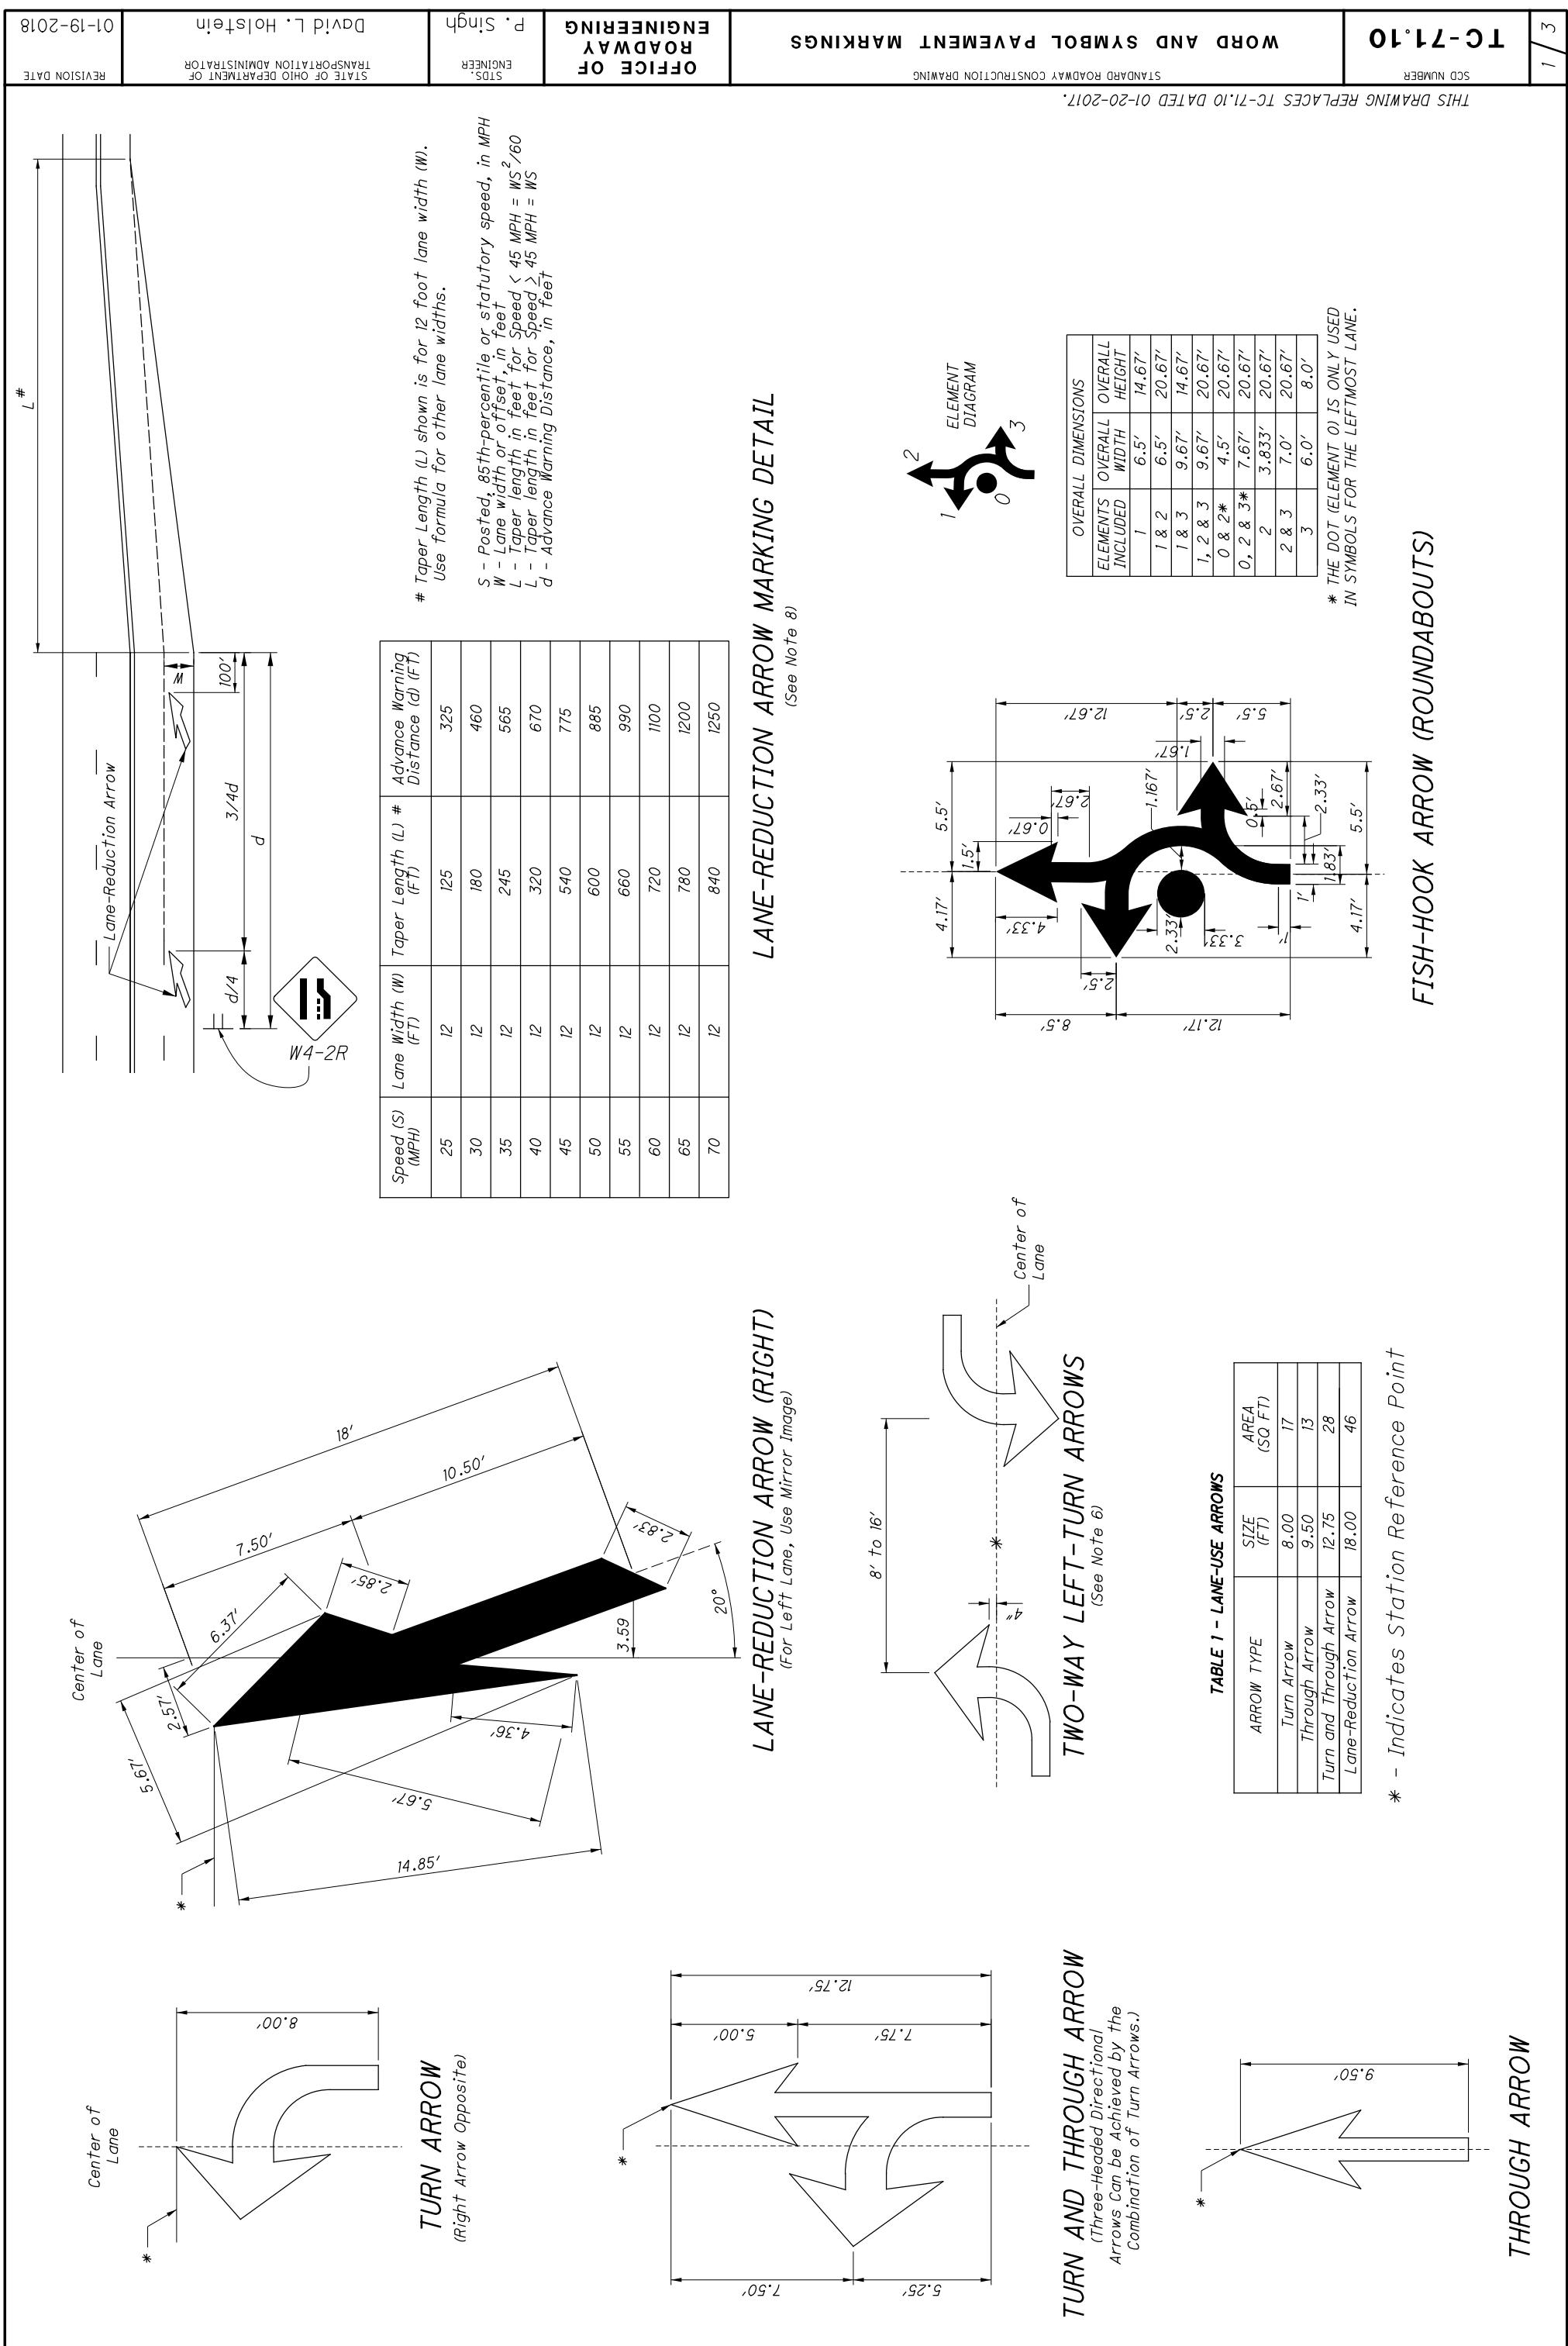

Special care shall be taken during construction to obtain maximum compaction of asphalt concrete in gutters.

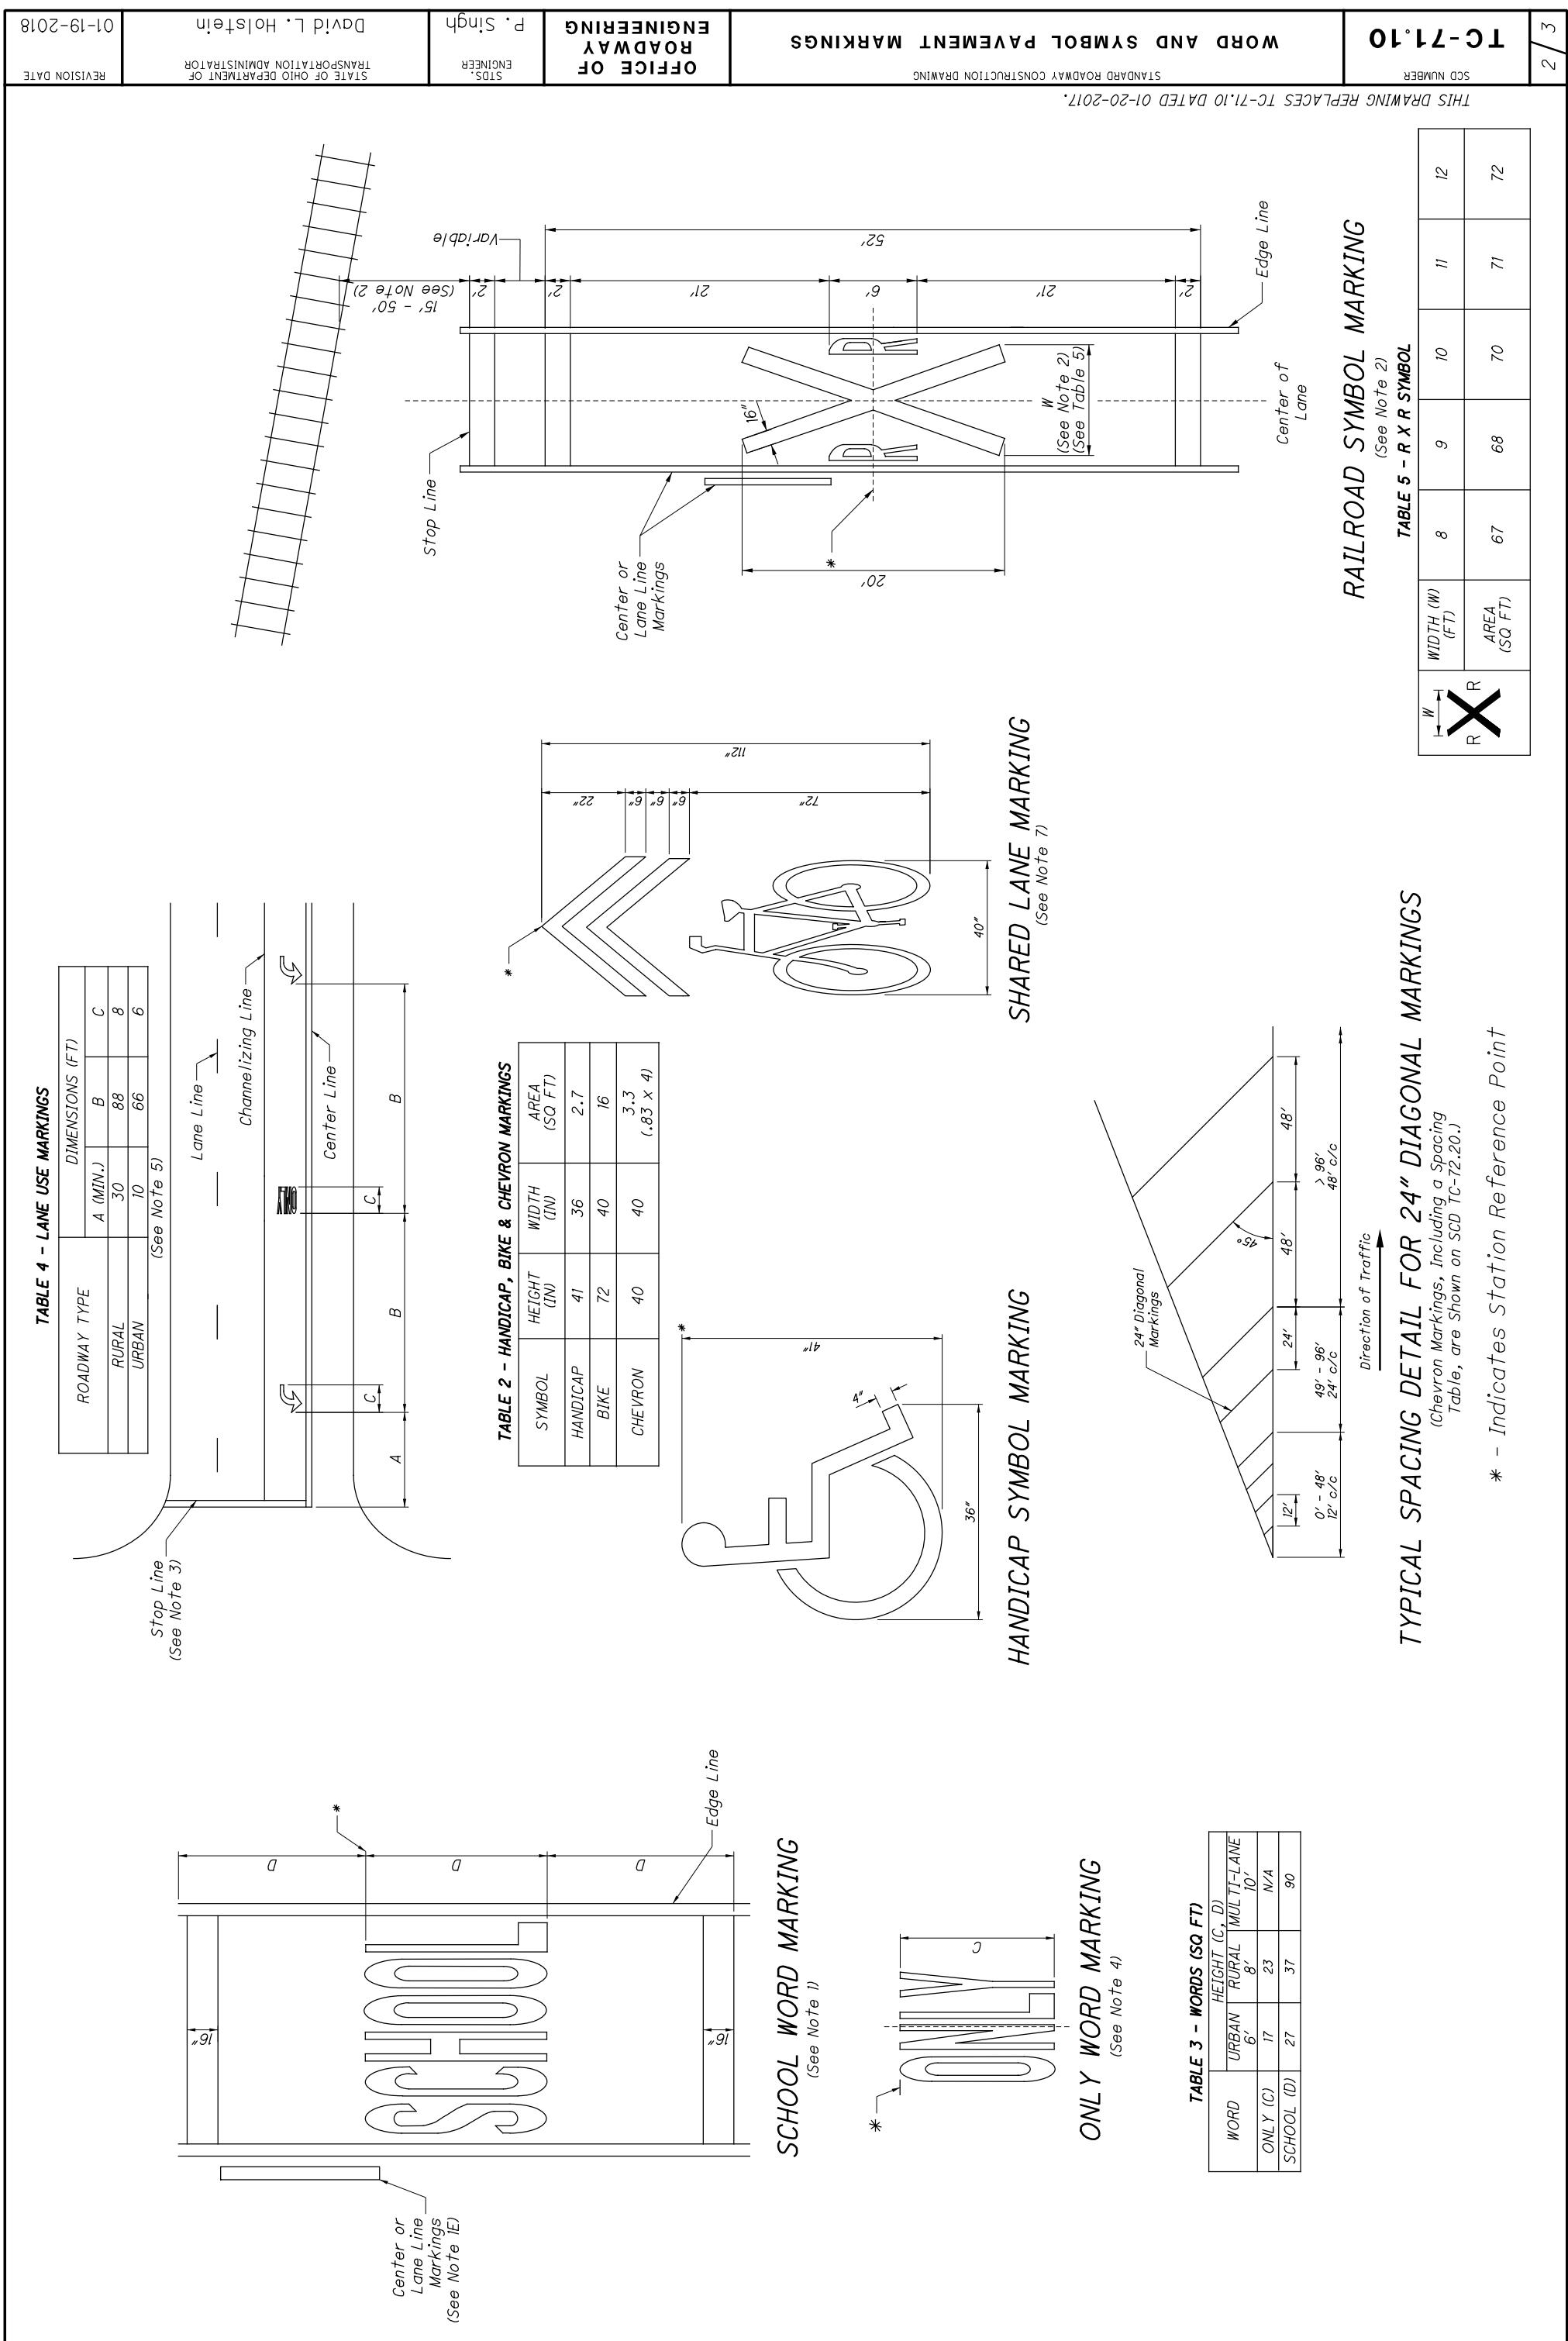

GUTTER FINISH

Aggregate drains to be placed where and as directed by Engineer. Provide Filter Fabric when specified as a separate pay item.

AGGREGATE DRAIN

NOTES:

SCHOOL Marking

- 1A. The SCHOOL markings shall be installed on all paved approaches in advance of all School Zones.
- 1B. The SCHOOL markings should be placed at least 100' in advance of the School Zone. The preferred placement of the SCHOOL marking is adjacent to the School Zone Advance sign.
- 1C. On two-way, two-lane highways the following shall apply:

- 1.) When the approach lane to the School zone is 11' or more in width -

- a.) The SCHOOL word marking and transverse lines shall be contained in, and centered in, the lane.
- b.) The character height shall be 6' for urban areas and 8' for rural areas.

- 2.) When the approach lane to the School zone is less than 11' in width -

- a.) One installation of the SCHOOL word marking and transverse lines shall extend across both lanes of traffic.
- b.) The characters shall be 10' in height.

- 1D. On multi-lane approaches the following shall apply -
- 1.) When the approach lanes to the School zone are 11' or more in width -

- a.) One installation of the SCHOOL word marking and transverse lines shall be contained in, and centered in, each lane.
- b.) The character height shall be 6' for urban areas and 8' for rural areas.

- 2.) When the approach lanes to the School zone are less than 11' in width -
- a.) One installation of the SCHOOL word marking shall extend to the width of two approach lanes.
- b.) Transverse lines shall extend across all approach lanes of traffic.
- c.) The characters shall be 10' in height.

- 1E. Center or lane lines shall not pass through the SCHOOL word marking.
- 1F. 6' and 8' high SCHOOL word marking shall be marked with 4" strokes.
- 1G. The area of the transverse lines varies with the width of the pavement; therefore, the area must be added to the value in Table 3 (sheet 2).

Railroad Crossing Markings

- 2A. On multi-lane approaches, markings shall be as follows -

- a.) The RXR symbol shall be placed in each approach lane.
- b.) Transverse lines used with the railroad symbols shall extend across all approach lanes.

- 2B. The railroad symbol should be located so that the Railroad Advance Warning (W10-1) sign is within the two transverse boundary lines of the railroad symbol.

- 2C. The stop line shall be located for best sight distance between 15' - 50' of the near edge of the tracks.

- 2D. The stop line shall be approximately 8' from a gate (if present).
- 2E. Width (W) of the "X" will vary according to the lane width.

- 2F. The height of the "R" shall be 6'.

- 2G. The area of the transverse lines and stop lines varies with the width of the pavement; therefore the area must be added to the value in Table 5 (sheet 2).

Stop Line Marking

- 3A. Except as specified in Notes 3B and 3C, the stop line should be placed as follows:

- a.) The stop line should be placed where cross-corner vision is maximum.
- b.) In no case shall the stop line be placed more than 30' or less than 4' from the nearest edge of the intersecting roadway.
- c.) For normal intersections the maximum distance should be 10'.

- 3B. If a marked crosswalk is present the stop line should be placed 4' in advance of, and parallel to, the nearest crosswalk line.

- 3C. For signalized intersections the stop line should be placed at a minimum distance of 40' from the nearest signal head.

ONLY Word Marking

- 4A. The ONLY word marking is optional.

- 4B. Where used, the spacing between ONLY and arrow markings should be based on Table 4 (sheet 2).
- 4C. When lane-use arrow markings are used and the ONLY marking is not, an additional lane-use arrow should be used in its place to retain the spacing as shown in Table 4 (sheet 2).

Lane-Use Arrow Markings

- 5A. Lane-use arrow markings are optional except where a through traffic lane(s) approaching an intersection becomes a mandatory turn lane(s).

- 5B. Where used, the spacing between markings should be based on Table 4 (sheet 2). However, based on the turn lane length, the spacing between the markings may be adjusted.

Two-Way Left-Turn Only (TWLTO) Arrows

- 6A. Arrow sets should be longitudinally spaced at intervals of:

- a.) 500' - 1000' for speeds less than or equal to 40 mph,
- b.) 1000' - 1500' for speeds over 40 mph

- 6B. In addition, an arrow set should be placed:

- a.) 100' - 200' from the near edge of an intersecting roadway, or
- b.) Inside both ends of TWLTO lanes.

Shared Lane Marking

- 7A. When chevron markings are used, its area must be added to the value of the bike symbol markings (see Table 2 on sheet 1).

- 7B. When used, the shared lane marking should be placed immediately after an intersection and spaced at intervals not greater than 250' thereafter.

Lane-Reduction Arrow Markings

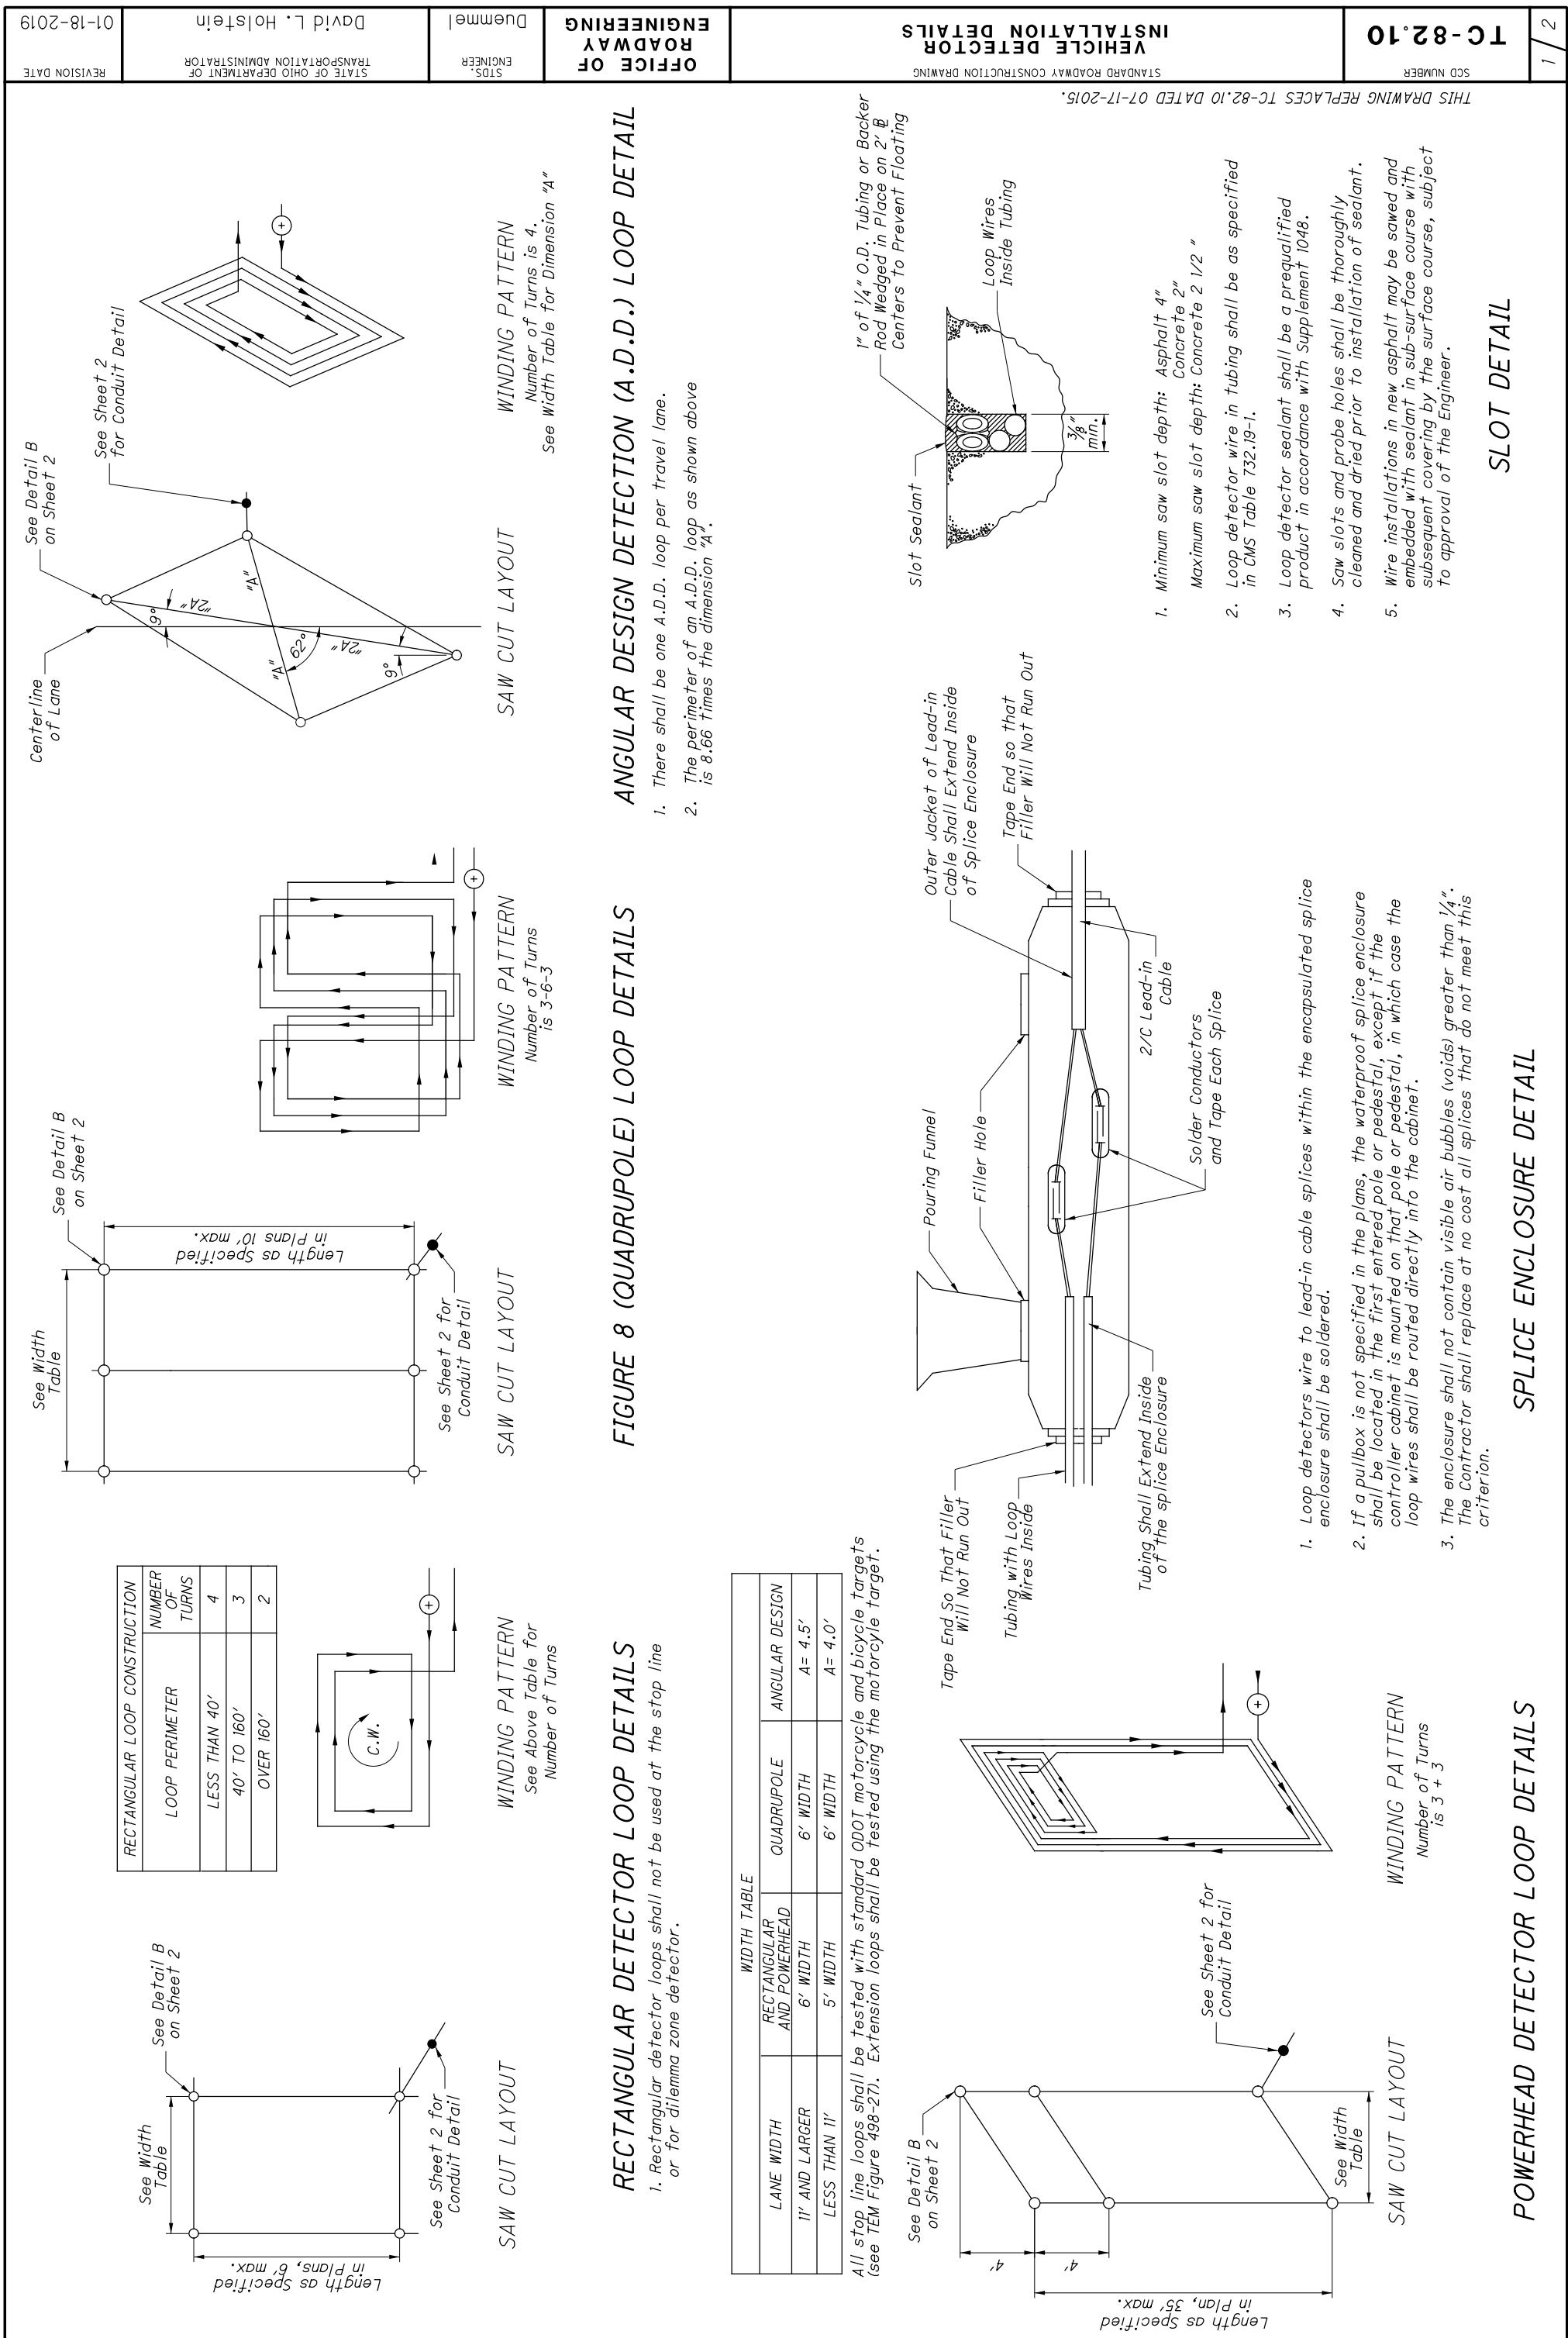

- 8A. Lane-reduction arrow markings should be placed where a lane reduction transition occurs on a roadway as follows:
- a.) Lane-reduction arrow markings may be placed for speeds of less than 45 mph, if determined to be appropriate based on engineering judgement.
- b.) Lane-reduction arrow markings should be placed for speeds of 45 mph or over.
- c.) Lane-reduction arrow markings may be placed in long acceleration lanes.
- d.) Where lane-reduction arrows are used, they should be placed as follows:

- i.) First lane-reduction arrow 100' in advance of the 'Begin Taper' point.
- ii.) Second lane-reduction arrow placed at the 3/4d point.

- 4A. The ONLY word marking is optional.

- 4B. Where used, the spacing between ONLY and arrow markings should be based on Table 4 (sheet 2).

- 4C. When lane-use arrow markings are used and the ONLY marking is not, an additional lane-use arrow should be used in its place to retain the spacing as shown in Table 4 (sheet 2).

MT-97.11 FLAGGER CLOSING 1 LANE OF A 2-LANE HIGHWAY OFFICE OF ROADWAY ENGINEERING								THIS DRAWING REPLACES MT-97.11 DATED 07-18-2014.	
STANDARD ROADWAY CONSTRUCTION DRAWING								SCD NUMBER	
<u>NOTES</u>								REVISION DATE	
<u>FLAGGERS</u>								01-20-2017	
1. Flaggers, one for each direction, shall be used to control traffic continuously for as long as a one lane operation is in effect. The flaggers shall be able to communicate with each other at all times.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>LENGTH OF CLOSURE</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
2. It is required that the length of closure be kept to a minimum at all times, as directed by the Engineer, with a maximum allowable length of 5000'. When the ambient temperature exceeds 80 degrees Fahrenheit the Engineer may increase the maximum allowable length of closure to allow for sufficient cooling of new pavement.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>CONES</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
7. Type A flashing warning lights shown on the ROAD WORK AHEAD (W20-1) signs and on the LANE CLOSED AHEAD (W20-5) signs are required whenever a night lane closure is necessary.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>FLASHING WARNING LIGHTS</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
7. Type A flashing warning lights shown on the ROAD WORK AHEAD (W20-1) signs and on the LANE CLOSED AHEAD (W20-5) signs are required whenever a night lane closure is necessary.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>CHIP SEAL OPERATION</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
8A. Cone spacing shall be as follows:								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
a) Spacing along the buffer shall be 40' center-to-center.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
b) Spacing along the approach taper shall be 10' center-to-center.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
8B. Cone sizes shall be as follows:								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
a) Cones used for daytime traffic control shall have a minimum height of 28".								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
b) Cones used for nighttime traffic control shall have a minimum height of 42".								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
8C. Provisions shall be made to stabilize the cones to prevent them from blowing over.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
8D. A minimum of two cones shall be used to close the paved shoulder.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>SIGN LOCATION AND SPACING</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
3A. The minimum spacing between work zone signs is shown in Table I. Maximum spacing should not be greater than 1.5 times the distances shown in Table I.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
3B. Sign spacing should be adjusted to avoid conflict with existing signs. Minimum spacing to existing signs shall be 200' for speeds of 45 mph or less and a minimum of 400' for speeds of 50 mph or greater.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
3C. The location of the advance warning signs should be adjusted to provide for adequate sight distance for the existing vertical and horizontal roadway alignment.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>ADJUSTMENTS FOR SIGHT DISTANCE</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
4. The location of the flagger station and the advance warning signs should be adjusted to provide for adequate sight distance for the existing vertical and horizontal roadway alignment.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>BASIC SIGNING</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
5A. ROAD WORK AHEAD (W20-1) signs shall be provided on entrance ramps or roadways entering the work limits.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
5B. END ROAD WORK (G20-2) signs are only required for lane closures of more than 1 day. If it is intended that these signs be placed on the mainline, on all exit ramps, and on roadways exiting the work limits.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
5C. Overlapping of signing for adjacent projects should be avoided where the messages could be confusing. Any ROAD WORK AHEAD or END ROAD WORK sign which falls within the limits of another traffic control zone shall be omitted or covered during the period when both projects are active.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>SIGNING DETAILS</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
6A. The Advisory Speed (W13-IP) plaque shall be used when specified in the plan.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
6B. 36" warning signs may be used when the approach speed limit is 40 mph or less.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>INTERSECTION / DRIVEWAY ACCESS</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
11. Within the length of closure, provision shall be made to control traffic entering from intersecting streets and major drives as necessary to prevent wrong-way movements and to keep vehicles off of new pavement not ready for traffic. The contractor shall:								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
a) Place across the closed lane, either three cones or barricades, and/or provide an additional flagger at every public street intersection and major driveway.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
Cones placed across the closed lane shall be located 25' beyond the projected pavement edges of the driveway or cross highway. For barricades, see Standard Construction Drawing MT-101.60.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
Existing STOP signs shall be relocated as necessary to assure proper location for the traffic conditions. The method of control shall be subject to the approval of the Engineer.								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	
<u>END</u>								12. For chip seal operations, additional signing shall be incorporated in accordance with CMS 422.09.	

PAVEMENT MARKING OPERATION PROCEDURES

NOTES:

GENERAL

- 1A. In addition to CMS 614, traffic shall be maintained in accordance with the following requirements.
- 1B. The purpose of the following requirements for traffic control for pavement marking operations is to provide safety for highway users, workers and equipment and to protect the markings from damage during application.

1C. These requirements are the required minimums. If at any time during the application of markings it is found by the Engineer that these minimum traffic control requirements are not achieving the necessary safety and marking protection, additional traffic control shall be implemented at no additional cost.

1D. The Engineer may suspend work in order to relieve traffic congestion at any time.

1E. No work shall be done during peak hours or during any other times which could result in excessive queuing, as determined by the Engineer.

1F. Vehicles transporting flammable pavement marking materials (material supply vehicles) shall not be utilized for lead or trail vehicles or for power broom equipment.

1G. All pavement marking application, protection and support equipment following the line marking machine shall have the traffic control equipment of a shadow vehicle.

1H. Line marking machines shall not be used for sign and cone placement.

CONES AND WET PAINT - KEEP OFF SIGNS

2A. Cones and WET PAINT - KEEP OFF (R11-H6-24) signs shall be placed to protect the line whenever the track-free time exceeds 2 minutes.

2B. These devices shall not be removed until the line has dried to a track-free condition.

2C. Retrieval equipment shall have the traffic control equipment of a shadow vehicle.

2D. Cones shall have a minimum height of 28".

2E. Cones shall be spaced at a maximum distance of 200' to protect the wet line. In areas of traffic congestion, on curves, and at other locations where tracking of the wet line is expected, closer spacings may be required.

2F. The WET PAINT - KEEP OFF (R11-H6-24) signs shall be placed facing traffic as follows:

- a) The beginning and end of line application,
b) All side and cross roads, and
c) Maximum intervals of one mile.

2G. When line markings require greater than a two minute drying time or when the actual field conditions exceed two minute drying time, the lane from which the line marking machine applies line markings shall be closed until the line has dried to a totally track-free condition.

IMMOBILE OPERATIONS

- 3A. When loading material, cleaning or performing other operations in the field, every effort shall be made to have all equipment completely off of the traveled way.

3B. When it becomes necessary to enter upon private property, permission shall be obtained in advance.

3C. When the Contractor cannot remove his equipment from the traveled way, all traffic control devices on the vehicles shall be in operation and flaggers and vehicles shall be stationed to protect the work site and the traveling public.

3D. Two-way traffic shall be maintained.

3E. Flaggers shall be equipped in accordance with CMS 614/08.

AUXILIARY MARKINGS

4. Pavement preparation and placing of auxiliary markings are considered to be stationary operations and traffic control shall be in accordance with Plan details, standard construction drawings and the Ohio Manual of Uniform Traffic Control Devices (OMUTCD).

NIGHTTIME OPERATION

- 5A. Nighttime operation is defined to include the time from sunset to sunrise, and at any other time when there are unfavorable atmospheric conditions or when there is not sufficient natural light to render discernible persons, vehicles, and substantial objects on the highway at a distance of 1000'.

5B. During nighttime conditions the following traffic control shall be provided:

- a) Cones shall be reflectorized or equipped with lighting devices for maximum visibility (see OMUTCD 6F-64), and
b) The guide and side-mounted carriages shall be illuminated.

5C. The presence of highway lighting does not waive these requirements.

ARROW BOARD

- 6A. A Type B arrow board shall be from the ODOT approved list. For more information, refer to Supplemental Specification 921 "Arrow Boards."

6B. Arrow boards, when used on two-lane, two-way roadways shall be displayed only in the caution mode.

6C. When not in use, arrow boards shall be tilted horizontally or covered.

TRUCK-MOUNTED ATTENUATOR (TMA)

- 7A. When called for in the plans the shadow vehicle(s) shall be equipped with a TMA. The TMA must bring a vehicle weighing about 1800 to 4500 pounds and traveling at 60 mph to a safe, controlled stop, per NCHRP criteria.

7B. A shadow vehicle with TMA should be used in accordance with manufacturer's specifications and must meet NCHRP 350 with acceptable written manufacturer certification submitted to the Engineer before the devices are used on the project.

PAVEMENT MARKING VEHICLES AND EQUIPMENT

LEAD VEHICLE

- 8A. A lead vehicle shall be used to warn opposing traffic of the approach of center line and other marking equipment when this equipment extends into the adjacent opposing traffic lane.
- 8B. The lead vehicle shall precede the "left-of-center" marking equipment a distance that will provide advance safe warning to approaching traffic.
- 8C. The operator of this unit shall drive ahead of the crest of a vertical curve or around a horizontal curve and wait until the "left-of-center" marking equipment nears and then proceed, maintaining an advance location of 400' to 600'.
- 8D. A lead vehicle shall be equipped with the following traffic control devices:
- A high-intensity yellow rotating, flashing, oscillating, or strobe lights, clearly visible a minimum of one quarter mile.
 - Lighted headlights and taillights, and
 - A KEEP RIGHT (W24-H4-48) sign and WET PAINT (W24-H3-48) sign mounted a minimum of 5' above the road surface measured to the bottom of the sign, and visible to opposing traffic.

POWER BROOM EQUIPMENT

9. Power broom equipment shall be equipped and operated during pavement preparations with the following traffic control devices:
- A high-intensity yellow rotating, flashing, oscillating, or strobe lights, clearly visible a minimum of one quarter mile.
 - Lighted headlights and taillights, and
 - A Type B arrow board, displayed to the rear, mounted a minimum of 7' above the road surface, measured to the bottom of the board.

VEHICLE FOR LAYOUT AND PREMARKING

10. The vehicle used in layout and premarking shall be equipped and operated with the following equipment:

- A high-intensity yellow rotating, flashing, oscillating, or strobe lights, clearly visible a minimum of one quarter mile.
- Lighted headlights and taillights, and
- A KEEP RIGHT (W24-H4-48) sign mounted a minimum of 5' above the road surface measured to the bottom of the sign, and visible to opposing traffic.

LINE MARKING MACHINE

- 11A. All traffic line marking machines shall be equipped and operated with the following traffic control equipment:
- Three high-intensity yellow rotating, flashing, oscillating, or strobe lights, clearly visible a minimum of one quarter mile, one forward, one on the right rear and one on the left rear of the vehicle.

b) Any one of the following two:

- A Type B arrow board displayed to the rear, mounted a minimum of 7' above the road surface, measured to the bottom of the board.
- A DO NOT PASS (R11-H7-48) sign visible to the rear during center line marking on two-lane, two-way roadways and mounted a minimum of 7' above the road surface, measured to the bottom of the sign. This sign may be used to cover the arrow board when used on two-lane, two-way roadways.

i1B. A WET PAINT with Arrow (W24-H2a-24 or W24-H2-48) sign shall face the rear as follows:

- a) The sign shall be positioned with the arrow pointing to the wet line.

- b) When used, a W24-H2a-24 sign shall be mounted on the side of the vehicle nearest the wet marking material.

- c) W24-H2a-24 and W24-H2-48 signs shall be mounted a minimum of 1' above the road surface, measured to the bottom of the signs.

i1C. A KEEP RIGHT (W24-H4-48) sign and WET PAINT (W24-H3-48) sign mounted a minimum of 5' above the road surface, measured to the bottom of the sign facing opposing traffic when this unit extends into the adjacent opposing traffic lane.

i1D. The guide and side-mounted marking carriages shall each be equipped with a clear red flag not less than 24" square and fastened to a staff of sufficient length so as to permit the flag to move freely of any obstruction.

SHADOW VEHICLE

- 12A. When required, a shadow vehicle shall be positioned at the track-free end of the wet line.

i2B. Shadow vehicles shall be equipped and operated with the following traffic control equipment (Also see Figure 6H-17 & 6H-35 in the OMUTCD):

- A high-intensity yellow rotating, flashing, oscillating, or strobe light(s), clearly visible a minimum of one quarter mile.

- b) Any one of the following two:

- A Type B arrow board, displayed to the rear, mounted a minimum of 7' above the road surface, measured to the bottom of the board.
- A DO NOT PASS (R11-H7-48) sign visible to the rear during center line marking on two-lane, two-way roadways and mounted a minimum of 7' above the road surface, measured to the bottom of the sign. This sign may be used to cover the arrow board when used on two-lane, two-way roadways.

- 12C. A WET PAINT with Arrow (W24-H2a-24 or W24-H2-48) sign shall face the rear as follows:
- The sign shall be positioned with the arrow pointing to the wet line.
 - When used, W24-H2a-24 shall be mounted on the side of the vehicle nearest the wet marking material.
 - W24-H2a-24 signs shall be mounted a minimum of 1' above the road surface and W24-H2-48 shall be mounted a minimum of 5' above the road surface, both measured to the bottom of the sign.

MINIMUM PAVEMENT MARKING TRAFFIC CONTROL EQUIPMENT REQUIREMENTS

This table indicates the traffic control equipment which shall be furnished for each type of long line pavement marking operation. In addition, the type of traffic control equipment which shall be furnished when directed by the Engineer is indicated.

EQUIPMENT	PAVEMENT MARKING LINE TYPE		
	CENTER LINE	EDGE LINE	LANE LINE CHANNELIZING LINE ②
LONGER THAN 2 MIN. OR LESS DRY	LONGER THAN 2 MIN. OR LESS DRY	LONGER THAN 2 MIN. OR LESS DRY	LONGER THAN 2 MIN. OR LESS DRY
LEAD VEHICLE	A	A	C
POWER BROOM EQUIPMENT	B	B	B
LINE MARKING MACHINE	A	A	A
SHADOW VEHICLE (ADDITIONAL)	D	D	A
SHADOW VEHICLE (SIGN AND CONE RETRIEVAL)	C	C	C
SHADOW VEHICLE (SHADOW FOR RETRIEVAL)	A	C	C

① For equipment requirements for auxiliary marking operations see the plans and OMUTCD Part 6.

② Includes both dashed and solid lane lines.

③ Channelizing line segments of 200' or less shall be considered auxiliary markings, except when applied as components of gore markings sprayed in moving operations separate from the application of transverse lines.

A Required equipment

B Equipment required when directed by the engineer

C Not required

D Required equipment for sign and cone placement

**STATE
WAGE
RATES**

(2019)
Updated 1/14/19

Prevailing Wage Determination Cover Letter

County:

Determination Date: 01-14-19

Expiration Date: 04-14-19

THE FOLLOWING PAGES ARE PREVAILING RATES OF WAGES ON PUBLIC IMPROVEMENTS FAIRLY ESTIMATED TO BE MORE THAN THE AMOUNT IN O.R.C. SEC. 4115.03 (b) (1) or (2), AS APPLICABLE.

Section 4115.05 provides, in part: "Where contracts are not awarded or construction undertaken within ninety days from the date of the establishment of the prevailing wages, there shall be a redetermination of the prevailing rate of wages before the contract is awarded." The expiration date of this wage schedule is listed above for your convenience only. This wage determination is not intended as a blanket determination to be used for all projects during this period without prior approval of this Department.

Section 4115.04, Ohio Revised Code provides, in part: "Such schedule of wages shall be attached to and made a part of the specifications for the work, and shall be printed on the bidding blanks where the work is done by contract..."

The contract between the letting authority and the successful bidder shall contain a statement requiring that mechanics and laborers be paid a prevailing rate of wage as required in Section 4115.06, Ohio Revised Code. The contractor or subcontractor is required to file with the contracting public authority upon completion of the project and prior to final payment therefore an affidavit stating that he has fully complied with Chapter 4115 of the Ohio Revised Code.

The wage rates contained in this schedule are the "Prevailing Wages" as defined by Section 4115.03, Ohio Revised Code (the basic hourly rates plus certain fringe benefits). These rates and fringes shall be a minimum to be paid under a contract regulated by Chapter 4115 of the Ohio Revised Code by contractors and subcontractors. The prevailing wage rates contained in this schedule include the effective dates and wage rates currently on file. In cases where future effective dates are not included in this schedule, modifications to the wage schedule will be furnished to the Prevailing Wage Coordinator appointed by the public authority as soon as prevailing wage rates increases are received by this office.

"There shall be posted in a prominent and accessible place on the site of work a legible statement of the Schedule of Wage Rates specified in the contract to the various classifications of laborers, workmen, and mechanics employed, said statement to remain posted during the life of such contract." Section 4115.07, Ohio Revised Code.

Apprentices will be permitted to work only under a bona fide apprenticeship program if such program exists and if such program is registered with the Ohio Apprenticeship Council.

Section 4115.071 provides that no later than ten days before the first payment of wages is due to any employee of any contractor or subcontractor working on a contract regulated by Chapter 4115, Ohio Revised Code, the contracting public authority shall appoint one of his own employees to act as the prevailing wage coordinator for said contract. The duties of the prevailing wage coordinator are outlined in Section 4115.071 of the Ohio Revised Code.

Section 4115.05 provides for an escalator in the prevailing wage rate. Each time a new rate is established, that rate is required to be paid on all ongoing public improvement projects.

A further requirement of Section 4115.05 of the Ohio Revised Code is: "On the occasion of the first pay date under a contract, the contractor shall furnish each employee not covered by a collective bargaining agreement or understanding between employers and bona fide organizations of Labor with individual written notification of the job classification to which the employee is assigned, the prevailing wage determined to be applicable to that classification, separated into the hourly rate of pay and the fringe payments, and the identity of the prevailing wage Coordinator appointed by the public authority. The contractor or subcontractor shall furnish the same notification to each affected employee every time the job classification of the employee is changed."

Work performed in connection with the installation of modular furniture may be subject to prevailing wage.

THIS PACKET IS NOT TO BE SEPARATED BUT IS TO REMAIN COMPLETE AS IT IS SUBMITTED TO YOU. (Reference guidelines and forms are included in this packet to be helpful in the compliance of the Prevailing Wage law.)

3 Journeymen to 1 Apprentice thereafter

Jurisdiction (* denotes special jurisdictional note) :

CUYAHOGA, GEAUGA

Special Jurisdictional Note : Hod Carriers and Common Laborers - Heavy, Highway, Sewer, Waterworks, Utility, Airport, Railroad, Industrial and Building Site

Details :

Group 1

Laborer (Construction); Plant Laborer or Yardman, Right-of-way Laborer, Landscape Laborer, Highway Lighting Worker, Signalization Worker, (Swimming) Pool Construction Laborer,

Utility Man, *Bridge Man, Handyman, Joint Setter, Flagperson, Carpenter Helper, Waterproofing Laborer, Slurry Seal, Seal Coating, Surface Treatment or Road Mix Laborer, Riprap Laborer & Grouter, Asphalt Laborer, Dump Man (batch trucks), Guardrail & Fence Installer, Mesh Handler & Placer, Concrete Curing Applicator, Scaffold Erector, Sign Installer, Hazardous Waste (level D), Diver Helper, Zone Person and Traffic Control.

*Bridge Man will perform work as per the October 31, 1949, memorandum on concrete forms, by and between the United Brotherhood of Carpenters and Joiners of America and the Laborers' International Union of North America, which states in; "the moving, cleaning, oiling and carrying to the next point of erection, and the stripping of forms which are not to be re-used, and forms on all flat arch work shall be done by members of the Laborers' International Union of North America."

Group 2

Asphalt Raker, Screwman or Paver, Concrete Puddler, Kettle Man (pipeline), All Machine-Driven Tools (Gas, Electric, Air), Mason Tender, Brick Paver, Mortar Mixer, Skid Steer, Sheeting & Shoring Person, Surface Grinder Person, Screedperson, Water Blast, Hand Held Wand, Power Buggy or Power Wheelbarrow, Paint Stripper, Plastic fusing Machine Operator, Rodding Machine Operator, Pug Mill Operator, Operator of All Vacuum Devices Wet or Dry, Handling of all Pumps 4 inches and under (gas, air or electric), Diver, Form Setter, Bottom Person, Welder Helper (pipeline), Concrete Saw Person, Cutting with Burning Torch, Pipe Layer, Hand Spiker (railroad), Underground Person (working in sewer and waterline, cleaning, repairing and reconditioning). Tunnel Laborer (without air), Caisson, Cofferdam (below 25 feet deep), Air Track and Wagon Drill, Sandblaster Nozzle Person, Hazardous Waste (level B), ***Lead Abatement, Hazardous Waste (level C)

***Includes the erecting of structures for the removal, including the encapsulation and containment of Lead abatement process.

Group 3

Blast and Powder Person, Muckers will be defined as shovel men working directly with the miners, Wrencher (mechanical joints & utility pipeline), Yarner, Top Lander, Hazardous Waste (level A), Concrete Specialist, Curb Setter and Cutter, Grade Checker, Concrete Crew in Tunnels. Utility pipeline Tappers, Waterline, Caulker, Signal Person will receive the rate equal to the rate paid the Laborer classification for which the Laborer is signaling.

Group 4

Miner, Welder, Gunite Nozzle Person

A.) The Watchperson shall be responsible to patrol and maintain a safe traffic zone including but not limited to barrels, cones, signs, arrow boards, message boards etc.

The responsibility of a watchperson is to see that the equipment, job and office trailer etc. are secure.

Details :

**Apprentices will receive a 10% increase on top of the percentages listed above provided they are operating mobile equipment. Mechanic Trainees will receive 10% if required to have a CDL.

Class 1 - Air Compressors on Steel Erection; Asphalt Plant Engineers (Cleveland District Only); Barrier Moving Machine; Boiler Operators, Compressor Operators, or Generators, when mounted on a rig; Boom Trucks (all types); Cableways; Cherry Pickers; Combination- Concrete mixers & Towers; Concrete Pumps; Concrete Plants (over 4 yd capacity); Cranes (all types); Derricks (all types); Draglines; Elevating Graders or Euclid Loaders; Gradalls; Helicopter Crew (Operator- hoist or winch); Hoes (all types); Hoisting Engines; Hoisting Engines, on shaft or tunnel work; Hydraulic Gantry (lifting system); Locomotives (standard guage); Maintenance Operators (class A); Mixers, paving (single or double drum); Piledriving Machines (all types); Power Shovels, Prentice Loader; Quad 9 (double pusher); Rail Tamper (with automatic lifting and aligning device); Refrigerating Machines (freezer operation); Rotary Drills, on caisson work; Side Booms; Slip Form Pavers; Tower Dericks; Trench Machines; Truck Mounted Concrete Pumps; Tug Boats; Tunnel Machines and /or Mining Machines; Wheel Excavators; Industrial-type tractors; Jet Engine - Dryer (D8 or D9) Diesel Tractors Mucking Machines; Multiple Scrapers; Tree Shreddes. Rough Terrain Fork-lift with Winch/Hoist; Compact Cranes,track or rubber over 4,000 pound capacity, self-erecting cranes:stationary,track or truck (all configurations) bucket trench machines (over 24 inches wide).

Class 2 - Asphalt Pavers; Automatic Subgrade Machines, self-propelled (CMI-type); Bobcat-type and /or skid steer loader with hoe attachment greater than 7000 lbs.; Boring Machine Operators (more than 48 inches); Bulldozers; Endloaders; Hydro Milling Machine; Kolman-type Loaders (production type-dirt); Lead Greasemen; Maintenance Operators, Class B (Portage and Summit Counties only); Pettibone-Rail Equipment; Power Graders; Power Scrapers; Push Cats; Lighting and Traffic Signal Installation Equipment includes all groups or classifications; Trench Machines (24inch wide and under); Vermeer Type Concrete saw. Material Transfer Equipment (Shuttle buggy) Asphalt All rotomills, grinders and planers of all types. Horizontal Directional Drill (Over 50,000 ft.lbs.thrust and over).

Class 3 - A-Frames; Air Compressors, on tunnel work (low Pressure); All Asphalt Rollers; Asphalt Plant Engineers (Portage and Summit Counties only); Bobcat-type and/or skid steer loader with or without attachments; Power Boilers (15 lbs pressure and over); Highway Drills (all types); Pump Operators (installing or operating well Points); Pumps (4 inch and over discharge); Railroad Tie Inserter/Remover; Rotovator (lime-soil Stabilzer); Switch & Tie Tampers (without lifting and aligning device); Locomotives (narrow gage); Mixers, concrete (more than one bag capacity); Mixers, one bag capacity (side loader); Utilities Operators, (small equipment); Welding Machines and Generators; Material hoist/elevators. Articulating/straight bed end dumps if assigned (minus \$4.00 per hour)

Class 4 - Ballast Re-loacator; Backfillers and Tampers; Batch Plant Operators; Bar and Joint Installing Machines; Boring Machine Operators (48 inch or less); Bull Floats; Burlap and Curing Machines; Concrete Plants (capacity 4 yd and under); Conveyors (highway); Concrete Saws (multiple); Crushers; Deckhands; Farm type tractors, with attachments (highway); Finishing Machines; Hydro Hammers; Hydro Seeders; Pavement Breakers (hydraulic or cable); Plant Mixers; Post Drivers; Post Hole Diggers; Power Brush Burners; Power Form Handling Equipment; Firemen, Floating Equipment (all types); Fork Lifts (highway), except masonry; Form Trenchers; Road Widening Trenchers; Rollers (brick, grade, macadam); Self-Propelled Power Spreaders; Self-Propelled Sub-Graders; Tractors, pulling sheepfoot rollers or graders; Steam Firemen; Vibratory Compactors, with integral power.

Class 5 - Compressors (portable, Sewer, Heavy and Highway); Generators; Inboard-Outboard Motor Boat Launches; Masonry Fork Lifts; Oilers/Helpers; Power Driven Heaters (oil fired); Power Scrubbers; Power Sweepers; Pumps (under 4 inch discharge); Signalmen; Drum Fireman (in Asphalt Plant); Oil Heaters (Asphalt Plant); Tire Repairmen; VAC/ALLS; Fueling and greasing (plus \$3.00), compact cranes; track or rubber under 4,000 pounds.

Class 6 - Master Mechanic
